

# Proposal for NSR Project 2023 - 2025

## MD 107 - Solar Cookers to Africa

# Solar Power is Clean

During the period 2021 to 2024, the Nordic Council of Ministers will prioritize the following focus areas

## 1. **Carbon neutrality and climate adaptation**

Strengthen research and development and the promotion of solutions that support carbon neutrality and climate adaptation, including in relation to transport, construction, food, and energy.

## 5. **International co-operation on the environment and climate**

Contribute to the positive development of international co-operation on the environment and climate, such as by promoting Nordic green solutions in the rest of the world.

## 9. **Welfare for all**

Contribute to good, equal, and secure health and welfare for all.

# NSR Can Make a Difference

- Use of fire wood causes erosion
- Collection fire wood is laborious and dangerous
- Cooking with fire wood causes illnesses
- Clean solar cooking gives opportunities to develop the society and saves the environment
- NSR project enables making and donating 1300 new cookers to the villages
- The project affects directly the lives of 10 000 people
- Environmental values multiply the number of beneficiaries.

Wood collection

# Local Production in Kenya

- New, durable and efficient cooker model
- Materials can be acquired locally
- Local host lions and project manager
- Assembly in a local workshop
- Number of cookers can be adjusted to the budget.

# Advanced Training Program

- Professional head trainer gives cooker classes to the area trainers
- Area trainers are appointed by local government, counties
- Area trainers go to the villages and instruct the cooker recipients to use and maintain cookers in the villages.
